Affiliated to University of Kerala- NAAC reaccredited with 'A' grade

Research & PG Department of Chemistry

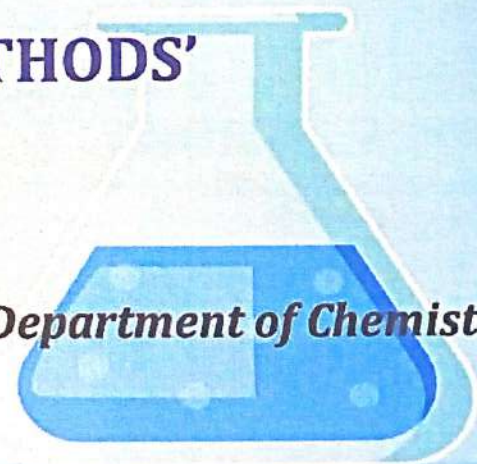

Certificate course in

'LAB SAFETY RULES AND METHODS'

Qualification: Plus Two (Science)

Duration: 6months

"Admission is open now and can be taken directly from Department of Chemistry"

Contact Details:

HOD: Dr. S. V. Manoj : +91 9446900213

Course coordinator: Dr. Sreeremya T. S: +91 9745270050

2021-2022

Department certificate course

**Lab safety rules and
methods**

CERTIFICATE COURSE

(Offered By Department of Chemistry, S N College, Kollam)

Lab Safety Rules and Methods

Total Hours: 30

Aim of the Course

To develop awareness among students about the different aspects of laboratory safety, since, it is essential to take proper precautions and implement safety guidelines while working in the laboratory.

Course objectives

- General lab safety rules and guidelines
- How to detect and control lab hazards
- Requirements for a Chemical Hygiene Plan

GENERAL ASPECTS OF EVALUATION

Mode of Evaluation – Certificate Course on Lab Safety Rules and Methods

- i. Attendance for lecture session
- ii. Test for theory

The weightage is shown in Table I

Table I

No	Component	Marks
I	Paper-I	100

DISTRIBUTION OF HOURS

Hours/Week	Course code	INSTRUCTIONAL HOURS
Theory		
5	CPLSRM	5 × 6=30

COURSE OUTCOME

Co No	COURSE OUTCOME Upon completion of this course, students	Cognitive Level
1	Develop knowledge about laboratory safety, laboratory emergencies and chemical hazards	U
2	Managing and working with chemicals, waste handling etc.	U, A
3	Develop skill in operating laboratory equipments.	A

LAB SAFETY RULES AND METHODS

30 Hours

Module 1: Introduction to Laboratory Safety (6 hours)

Risks in a research laboratory, health effects due to hazardous chemical exposure, methods to determine the hazards associated with specific chemicals, exposure routes, toxicity risk assessment, personal protective equipment (PPE), proper attire: eye/face protection, lab coats, gloves, respirators, disposal/removal of PPE, emergency equipment safety showers/eye washes, environmental health and safety (EHS)

Module 2: Laboratory Emergencies: Spills and Fires (4 hours)

General preparation for emergencies, handling the accidental release of hazardous materials notifications, spill containment and clean-up, leaking gas cylinders: causes and prevention, fires classification, fire extinguishers; types and method of operation

Module 3: Chemical Hazards (5 hours)

Chemical hygiene plan, the new safety data sheets (SDS) versus the old material safety data sheets (MSDS), assessment of chemical toxicity, toxic hazards: dose and risk assessment, types of toxins, flammable hazards, flammability characteristics, flammability classes, causes of ignition, reactive hazards, explosives.

Module 4: Managing and Working with Chemicals (6 hours)

General considerations: chemical segregation, transfer and transport, chemical fume hoods (safety, types, operation), other types of ventilation, working with highly toxic compounds: general considerations, planning, precautions for minimizing exposure – handling, in the event of a spill, working with flammable substances (standard operating procedures), working with highly reactive or explosive substances, working with compressed gases: parts of the cylinder, cylinder pressure regulator, storage guidelines, transporting cylinders, handling compressed gas cylinders.

Module 5: Waste Handling (4 hours)

Characterization of waste, collection and storage (lids, leaks, labels, location, containers), consequences of mixing incompatibles solid wastes (chemicals, broken glass, sharps, cylinders, pick-up), hazardous waste minimization

Module 6: Laboratory Equipment (5 hours)

Working with electricity, working with water (liquid)-dependent equipment (hazards, proper use, heating baths), working with high pressure/vacuum, working with vacuum pumps, working with stirring and mixing devices, working with heating devices (oil, salt, sand baths, microwave ovens), working with ultrasonicators and centrifuges. Examples of common mistakes and ways to avoid them.

P.G. and Research Department of Chemistry, Sree Narayana College, Kollam

Certificate course in lab safety rules and methods

Laboratories contain scores of hazardous chemicals and biologics that can act as carcinogens, irritants, corrosives, allergens and sensitizers, asphyxiants, explosives, toxins, and flammables. The dangers associated with lab equipment include exposure to extreme temperatures, explosions or implosions due to high or low pressures, moving parts (e.g., centrifuges and vacuum pumps), and high voltage. In short, a typical chemistry or biochemistry lab is replete with perils that run the gamut from the mundane to the exotic. Laboratory safety involves the development of skills and responsibility and must be an integral part of every chemistry curriculum. Laboratory safety is the key in preventing injury and illness as a result of working in a laboratory. There are opportunities for exposure to hazards in a laboratory that may not have been considered as hazardous before. It is important to have proper training to get awareness on the potential dangers so that correct precautions and safe guards are learned and practiced. The creation of a culture of laboratory safety requires a broad commitment from all levels of the educational institution. The aim of the course is to *'develop awareness among students about the different aspects of laboratory safety, since it is essential to take proper precautions and implement safety guidelines while working in the laboratory.'*

The certificate course in **lab safety rules and methods** (CPLSRM), offered by the Research and post graduate department of Chemistry, Sree Narayana College, Kollam is designed to introduce students to the array of dangers associated with research in the chemical sciences.

The certificate course in **Lab safety rules and methods** (CPLSRM), covers the following aspects

- General lab safety rules and guidelines
- How to detect and control lab hazards
- Requirements for a Chemical Hygiene Plan

Who Should Apply?

The certificate course in **Lab safety rules and methods** (CPLSRM), is open to all students with chemistry background at the higher secondary level and those who want pursue their career in research.

Minutes of the meeting of Board of Studies Members held on 20th December 2021

A Special meeting of the Board of Studies Members was held on 20th December 2021 at 2.00 pm. at the Department of chemistry, Sree Narayana College, Kollam. The agenda of the meeting was to decide the Exam date and pass criteria for the certificate course, Lab Safety Rules and Methods.

The opening remarks were given by Dr. Manoj S. V. (Chairman), HOD, and associate professor of chemistry. Dr. Sreeremya T. S., Assistant Professor of Chemistry requested input from the panellists in order to choose the exam date and pass requirements for the certificate program. It was decided to pass the students if they gained a score of 50% or higher in line with the suggestions made by the panellists. Additionally, it was decided to provide grades based on the marks obtained. Students who attain a score of >90% will get an A+; if their score is between 80 and 90%, they will get an A. Similarly, a grade of B is assigned for scores between 70 and 80% and so on. D is the lowest passing grade (when the score is $\geq 50\%$ and $< 60\%$). It was decided to conduct the examination on 3rd January 2022. The meeting was concluded at 3 pm.

Minutes of the meeting of Board of Studies Members held on 18th June 2021

A Special meeting of the Board of Studies Members was held on 18th June 2021 at 2.00 pm. at the Department of chemistry, Sree Narayana College, Kollam. The purpose of the meeting was to finalize the syllabus and course commencement date for the certificate course, Lab Safety Rules, and Methods.

Dr. Manoj S. V. (Chairman), HOD and associate professor of chemistry, made the introductory remarks. Dr. Sreeremya T. S, Assistant Professor of Chemistry, asked for the expert opinion of the panel members to finalize the syllabus. Dr.V. L. Pushpa, Former H.O.D. Chemistry, Dr. Deepa J. R, Mr. Abhilash S, Dr. Mini S, and Dr.Rijith. S from the Department of Chemistry, and Dr. Asha Banu. S, Assistant Professor, S. N. College for Women, Kollam have suggested a few changes in the syllabus. Dr. Sreeremya T. S (Coordinator) has agreed to revise the syllabus by incorporating all the suggestions. It was also decided to start the course on 1st July 2021. The meeting was concluded at 3 pm.

Minutes of the department meeting held on 15th JUNE, 2021

The chemistry department faculty meeting was conducted on 15th June 2021 at 2.00 pm. at the Department of chemistry, Sree Narayana College, Kollam. The purpose of the meeting was to select members of the Board of Studies for the certificate program in Lab Safety Rules and Methods.

Dr. Manoj S. V., HOD and associate professor of chemistry, made the opening comments and asked for suggestions for identifying the members of the board of studies. Dr. Manoj S. V. has been nominated as the chairman. Dr. Sreeremya T. S, Assistant Professor of chemistry has been selected as the course coordinator. It was suggested to include Dr.V. L. Pushpa, Former H.O.D. Chemistry in the panel to use her expertise in the field. Dr. Rema Devi B. Dr. P. Nikhil Chandra, Dr. Praveen Prakash, Dr. Deepa J. R, Mr. Abhilash S, Dr. Mini S, Dr.Rijith. S, and Dr. Deepa J. P were also included in the Board of Studies. Dr. Asha Banu. S, Assistant Professor, S. N. College for Women, Kollam, has been selected as the external expert. It was decided to call an immediate meeting of the board of studies members on 18th June 2021, at 2.00 pm. The meeting was concluded at 3 pm.

Final report

PG & research department of chemistry, SN college Kollam, provided short-term certificate courses to students, with a central objective of supplementing their academic curricula. This certificate course in *lab safety rules and methods* is designed to introduce students, to the array of dangers associated with research in the chemical sciences.

Out of 23 students applied, 21 were selected for the course. The classes were handled by expert teachers from the chemistry department. This course has given students a basic understanding of laboratory safety and an awareness of potential hazards that may run into while working there.

After completing the course, the students are now aware of the need for safety when handling potentially hazardous materials and other hazards in the lab. With the help of this course, students will be able to recognize dangers, evaluate the risks associated with various chemicals and equipment, take the necessary precautions, and put safety rules into practice to ensure their safety while working in the lab. They can now practice safety procedures and use the applied procedures to handle chemicals and laboratory equipment. All of the selected candidates finished the certificate program successfully. In a summative assessment, all the students attained A+ grades.
