Relevance of the Course

1. **Theatre helps us to see a different perspective from our own.** We're shown humanity, psychology, motivations, conflict and resolution. We as the audience get to witness the trajectory of persons other than ourselves. As artists, we put ourselves into emotional and intellectual situations that may never arise in our personal lives. Theatre promotes us to give power to truth, to take risks and to advocate for new and diverse voices.
2. **Theatre reminds us that we are not alone.** Not only are we sharing space and an experience with the artists who are performing, we are sharing the experience with fellow audience members. Movies and television don't have the same intimacy or sense of participation. Sharing an experience with live actors and live audience members is not only valuable, it's necessary for human connection.
3. **Theatre is immediate, evolving and always different.** Although the script may be the same every night, the performance is unique, each and every time it happens. No two performances are ever the same. In this way, everyone involved has a distinct and unique experience that can never be replicated.
4. **Live theatre helps to promote social discourse, dialogue and potential social change.** Theatre is a cultural phenomenon that demands that society examines itself in the mirror. We can study societal problems and attempt to find solutions. Coming together as a community to listen to opposing points of view is necessary.

5. **Theatre promotes education and literacy.** Studies have shown that students who participate in theatre do better in school.
